## SYSTEMS DESIGN & INSTALLATIONS

### SYSTEMS DESIGN & LAY OUT

Recognizing the desire of many customers to purchase an integrated material handling system from one source, rather than purchase discrete pieces of equipment from multiple vendors and then try to make them work together, The Eagle Group offers **turnkey material handling systems** offering efficient and cost effective solutions for clients in the dry, bulk material handling industries. Eagle has realized that

sometimes lowest price isn't always the lowest cost. With the expertise we have in the material handling industry, we add the consultative value to the customer relationship. Not just selling you commodity hardware items, but helping you find the right solution—that is truly cost effective.

Eagle has the **total capability** to provide customers with a **total solution**: design, engineering, fabrication, installation, and after installation customer support. Since Eagle provides complete turnkey solutions, we are able to act as a single source contractor and take **total responsibility** for the success of the material handling system and the project. The Eagle Group, Ltd. Has a proven record of creative and innovative ideas that provide the most efficient and economical solutions to customer-specific requirements.

Projects may involve storage vessels/tanks/hoppers, loading and unloading bulk containers, mechanical and pneumatic conveying, process controls and communications to PLC's or other factory systems as well as auxiliary items such as valves, sen-

**THE EAGLE GROUP LTD.**

**OUR EXTENSIVE SERVICES INCLUDE:**

- SYSTEM Analysis
- Detailed Timely Proposals
- System Design
- In-House Application Engineering

- As well as our specially designed equipment that provides unique features which complement our material handling designs & your needs!

Our material handling systems are based on working closely with our clients and applying our skills and expertise to their individual requirements. As a result, every one of our system designs are unique — designed to meet a client’s specific objectives in the most efficient and economical way, Our expertise also enables us to deliver an operational system in a short time frame for those customers that require “speed to market”.

The success of our projects is due in large part to the way we handle our Project Management & System Design. The way we handle these items is what sets us apart from our competition.

## INSTALLATIONS BY IN-HOUSE INSTALLATION CREWS

From the smallest of projects to an entire plant conveying and storage system, The Eagle Group has the capability to manage and implement your complete material handling needs.

Eagle has over half a century's experience in bulk material handling solutions, and allows you to benefit from our knowledge. Eagle knows how to design, fabricate, install and maintain our systems. Eagle's knowledgeable staff allows us to offer central control sequencing and inventory monitoring systems.

The Eagle Group, Ltd. can design your system, supply all of the storage, transfer, conveying and monitoring equipment. Eagle offers installations of these systems by our in-house installation crew. This allows your company the ability to have only one contact to satisfy all of your bulk material handling needs, Eagle's breadth of services allows us to accept complete responsibility and insure your satisfaction.

The proper initial design of your company's system will result in superior system operation. Eagle can offer a system design that will meet your company's present needs, as well as off flexibility for future expansions. We are skilled in a variety of system types and are experienced in selecting the proper system solution for your company's needs.

The Eagle Group, Ltd. has the ability to handle system installation. A project manager oversees and instructs the complete project, ensuring a proper, timely installation and timely installation and efficient operation.

Eagle is able to supply all necessary support for your system. We can design, supply, install, repair, and maintain your system. We supply parts and service on a variety of makes and models of equipment

and accessories.

Eagle's ability to optimize your system comes from years of experience in the bulk material handling business. Eagle can optimize your system to save you energy costs, reduce man-hours, time spent on maintenance, simplify operations and provide a reliable system. Optimization involves ensuring that each piece of equipment in the system is working properly and each component is tuned to work efficiently with all parts of the system.
